```
================================================================================
Version 0.27                                                        2020-04-09
================================================================================
* Contains XMT-120A firmware v1.19.
* Contains XMT-350 firmware v1.29.

================================================================================
Version 0.26                                                        2018-11-13
================================================================================
* Contains XMT-120A firmware v1.18.
* Contains XMT-350 firmware v1.28.

================================================================================
Version 0.24                                                        2017-08-17
================================================================================
* Contains XMT-120A firmware v1.18.
* Contains XMT-350 firmware v1.26.

================================================================================
Version 0.23                                                        2017-03-08
================================================================================
* Requires fewer CPU instruction set extensions.
* Contains XMT-120A firmware v1.18.
* Contains XMT-350 firmware v1.24.

================================================================================
Version 0.22                                                        2017-01-31
================================================================================
* Bug fixed: Communication timeout under OS X 10.10 Yosemite and later.
* Contains XMT-120A firmware v1.18.
* Contains XMT-350 firmware v1.24.

================================================================================
Version 0.21                                                        2014-05-22
================================================================================
* Contains XMT-120A firmware v1.17.
* Contains XMT-350 firmware v1.23.
* Fixed a performance issue.

================================================================================
Version 0.2                                                         2014-05-22
================================================================================
* Contains XMT-120A firmware v1.17.
* Contains XMT-350 firmware v1.23.
* Replaced communications back end for talking to the device capable of working
  with D2XX and with FTDIUSBSerialDriver.
* Support for OS X 10.9 Mavericks.
* Registers swfl file type.

================================================================================
Version 0.1-beta                                                    2013-06-01
================================================================================
* Initial release.
* Contains XMT-120A firmware v1.16.
* Contains XMT-350 firmware v1.22.
```
